Current employment

2015 –	Sir Peter Mansfield Imaging Center <i>Research Fellow</i> Employed as a research fellow position on a Leverhulme Trust funded grant “Revealing the origin of human alpha oscillations using ultra high-field fMRI-EEG” with Prof. Susan Francis, Dr. Karen Mullinger, & Dr. Rosa Sanchez-Panchuelo.	University of Nottingham, Nottingham UK
--------	--	---

Education

2012	Doctor of Philosophy (Physics) University of Sydney Thesis: <i>Spatiotemporal Hemodynamics: From Theory to Experiment</i> (December) Supervised by Prof. Peter Robinson (principal), Prof. Michael Breakspear (associate), Dr Mark Schira (associate) and Dr Peter Drysdale (associate).
2006	Bachelor of Science (Honors I) University of Sydney, Thesis: <i>Wavelet analysis of Brain activity</i> Supervised by Prof. Peter Robinson (principal), Prof. Michael Breakspear (associate).
2005	Bachelor of Science University of Sydney, Majors in Physics and Mathematics.

Expertise

Research areas fMRI, MRI, Spatiotemporal Hemodynamics, Modeling, Vision, Neural Field Theory, Networks, Data analysis, Image processing, Deconvolution, vistaTools, mrTools & SPM.

Programming: Proficient in MATLAB, & L^AT_EX. Familiar in Python, C, C++, CSS, & Java.

Research experience

2013 – 2015	University of Sydney <i>Research Associate, January 2013 – July 2015</i> Worked with Prof. Peter Robinson and Dr. Mark Schira on projects with Spatiotemporal hemodynamics, Brain Connectivity, Neural Field Modelling and co-supervised 3 PhD Students.	Camperdown, NSW, Australia
2012 – 2013	Queensland Institute of Medical Research <i>Research Assistant, July 2012 – January 2013</i> Worked under Part time (0.5) with Prof. Michael Breakspear projects on Deconvolution of fMRI data.	Herston, QLD, Australia
2012 – 2013	University of Sydney <i>Research Associate, July 2012 – January 2013</i> Worked under Part time (0.5) with Prof. Peter Robinson on projects with Spatiotemporal hemodynamics.	Camperdown, NSW, Australia
2005 – 2006	The Blackdog institute Research Assistant to Prof. Michael Breakspear Casual work to analyse Functional Magnetic Resonance Imaging (fMRI) data, and electrical encephalography (EEG). Also worked on a neural mass model that resulted in a publication.	Randwick, NSW, Australia

Honors and awards

2016	Guarantors of Brain Travel Grant Guarantors of Brain Travel Grant to attend the Organization for Human Brain Mapping Annual Meeting in Geneva, Switzerland travel Award, £600 GBP.
2013	Trainee Abstract Travel Award Organization for Human Brain Mapping Annual Meeting in Seattle, WA, USA travel Award for abstract: "Spatiotemporal neural dynamics from fMRI: Deconvolution with a spatiotemporal HRF", \$700 USD.
2007 – 2010	Australian Postgraduate Award Scholarship Australian government award. Stipend for \$20,000 AUD p/a while taking a research degree.
2006	Science Foundation for Physics, Scholarship No. 3 Faculty of Science, University of Sydney Prize for \$1000 AUD.
2005	Summer student scholarship Neuroscience Institute of Schizophrenia and Allied Disorders (NISAD) award: \$2000 AUD, for work on "Multiscale character of evoked cortical activity" with Prof. Michael Breakspear.
2003 – 2005	Faculty of Science Dean's List of Excellence in Academic Performance University of Sydney award for Years 1–3 of the undergraduate degree for having an average of High Distinction (85/100) or greater.
2003 – 2004	Talented Student Program University of Sydney first and second year program for students to undertake in projects in various research groups. First year: electron microscopy unit (Vicki Keast), Second year: Complex Systems (Michael Breakspear).

13. **Aquino, K.M.**, Robinson, P.A., Schira, M.M., Drysdale, P.M., & Breakspear, M. (June 2008). Characterization of physiologic and neural fluctuations in sensory-evoked fMRI of the primary visual cortex. *14th Annual Meeting of the Organization for Human Brain Mapping*, Poster No. 491, Melbourne, VIC, Australia.

Teaching & supervision

2016	Modeling Seminar Series Co-organized and gave 2 Lectures of a Modeling seminar series at the Sir Peter Mansfield Imaging center. Six lectures were scheduled with an attendance of ≈20 members that included staff from around the University of Nottingham.
2013 –	Associate Supervisor Honors Student (4th year) Thomas Lacy (2013), PhD Candidate Thomas Lacy (from 2014) and PhD Candidate James Pang (from 2015).
2014	First year informatics course: INFO 1903 Guest Lecture: "Hemodynamics: from Theory to experiment."
2011 – 2013	Supervisor Third year Physics special project students: Thomas Lacy (2011) & Nikhil Vasan (2013).
2011 – 2012	Teaching Assistant Redesign of Computational Physics module in Physics II.
2010 – 2012	Laboratory Supervisor Physics II, Computational Physics.
2006 – 2009	University Tutor Computational Physics II, Physics I, and Computational Science (First year course).

Academic Service

1. Organizer of Complex systems seminar series. (2013–2015)
2. Webmaster, Complex Systems group <http://physics.usyd.edu.au/complex-systems/> (2015)
3. Reviewer: Neuroimage (5 papers), Neural Networks (1 paper), Frontiers in Neuroscience (1 paper), Human Brain Mapping (Conference Abstracts) (60 Abstracts in total), Human Brain mapping (1 paper), PLoS Computational Biology (1 paper), & Journal of Neuroscience Methods (1 paper).
4. Volunteer for University of Sydney Open day.
